_____ Outside the general education class 21-60% of the time

_____ Outside the general education class more than 60% of the time

_____ Public separate school (day) facility

_____ Private separate school (day) facility

_____ Public residential facility

_____ Private residential facility

_____ Homebound/hospital

Please list the reasons that your school would like to participate in the Parents and Schools in Partnership program.

What are two of the biggest challenges facing your school district with respect to the education of students with Down syndrome?

How does your school district anticipate using the Down Syndrome Specialist? (Example: Train-the-trainer kind of position; resource for curriculum modifications; inclusion facilitator; etc.)

How many people from your district would like to attend this program? Are they able to commit to all four training sessions? Anticipated dates will be announced at the September 23 overview breakfast.

An objective of the Parents and Schools in Partnership Program is to help school districts connect to resources and best practices that can be used in supporting students with Down syndrome. How do you anticipate the information and lessons learned will be communicated within your school district? For example: a presentation held during an in-service day; the Down Syndrome Specialist writes an article for the district newsletter; etc.

How do you think this training will impact your school district as a whole?
